**Deltaville Boatyard's Latest Addition To Their Growing Toolbox –
A 75-Ton Marine Travel Lift**

July 18, 2011, Deltaville, VA – Deltaville Boatyard on Jackson Creek has been providing high-quality, American Boat and Yacht Council certified yacht repairs for over a decade. Deltaville Boatyard hauls, repairs and re-fits boats of all shapes and sizes with their staff of ABYC Master Technicians. Maintaining a professional, sophisticated-but-not-complicated approach to yacht repairs, refits and maintenance has put their services in high demand. Coupled with their excellent customer service and the quaintness that the community of Deltaville provides, Deltaville Boatyard is an excellent location for service work to be performed.

To increase its effectiveness and to accommodate all of their customers' needs, Deltaville Boatyard recently unveiled their new 75-ton marine travel lift. The new 75-ton lift compliments their existing 35-ton lift. With a beam capacity of 25 feet, the new behemoth lift will handle the longer, heavier and wider boats, that are becoming a larger portion of the industry in the recreational boating business.

"The number of larger sized vessels traveling the Chesapeake Bay and inland waterways has increased in recent years, and many loyal customers have been asking when Deltaville Boatyard will be able to haul their boats" said President Keith Ruse.

The substantial investment is already paying off. "We have been receiving calls from boaters bringing their vessels to the Bay and to Deltaville Boatyard for hurricane season now that we have the lift to accommodate them. We're excited by the addition of our new travel lift and what it means for our future," said Ruse.

The new travel lift is a big investment not only for the Deltaville Boatyard and Marina, but for the surrounding community as well. "Servicing larger vessels means more jobs," said Vice President of Operations Matt Holloway.

Deltaville Boatyard is an ABYC Standards Certified yacht repair facility located in the heart of the Chesapeake Bay. For additional information on their services offered visit them online at DeltavilleBoatyard.com, or call 804-776-8900.
